

Network centrality and tissue specificity as predictors of population-specific PBS

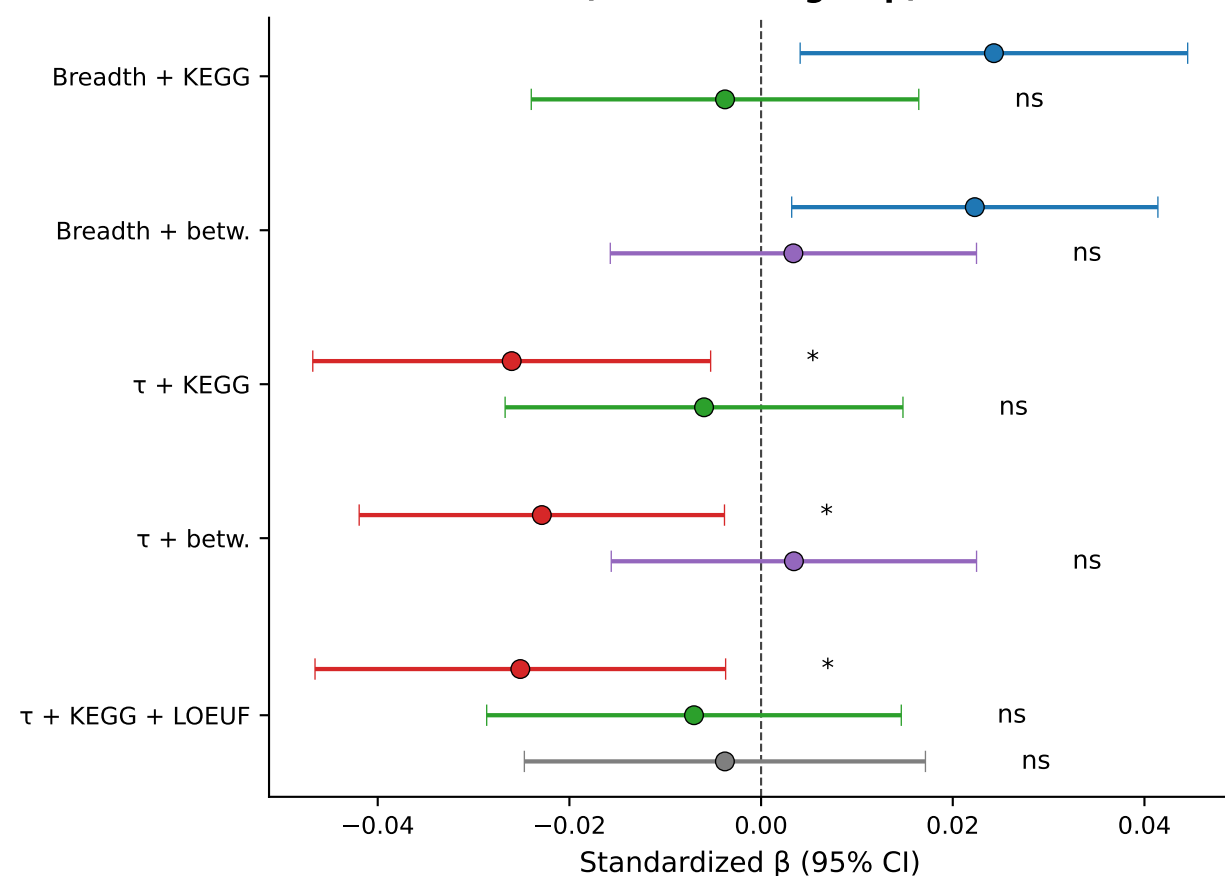

A. PBS-1 African (S. Asian outgroup) — added-variable

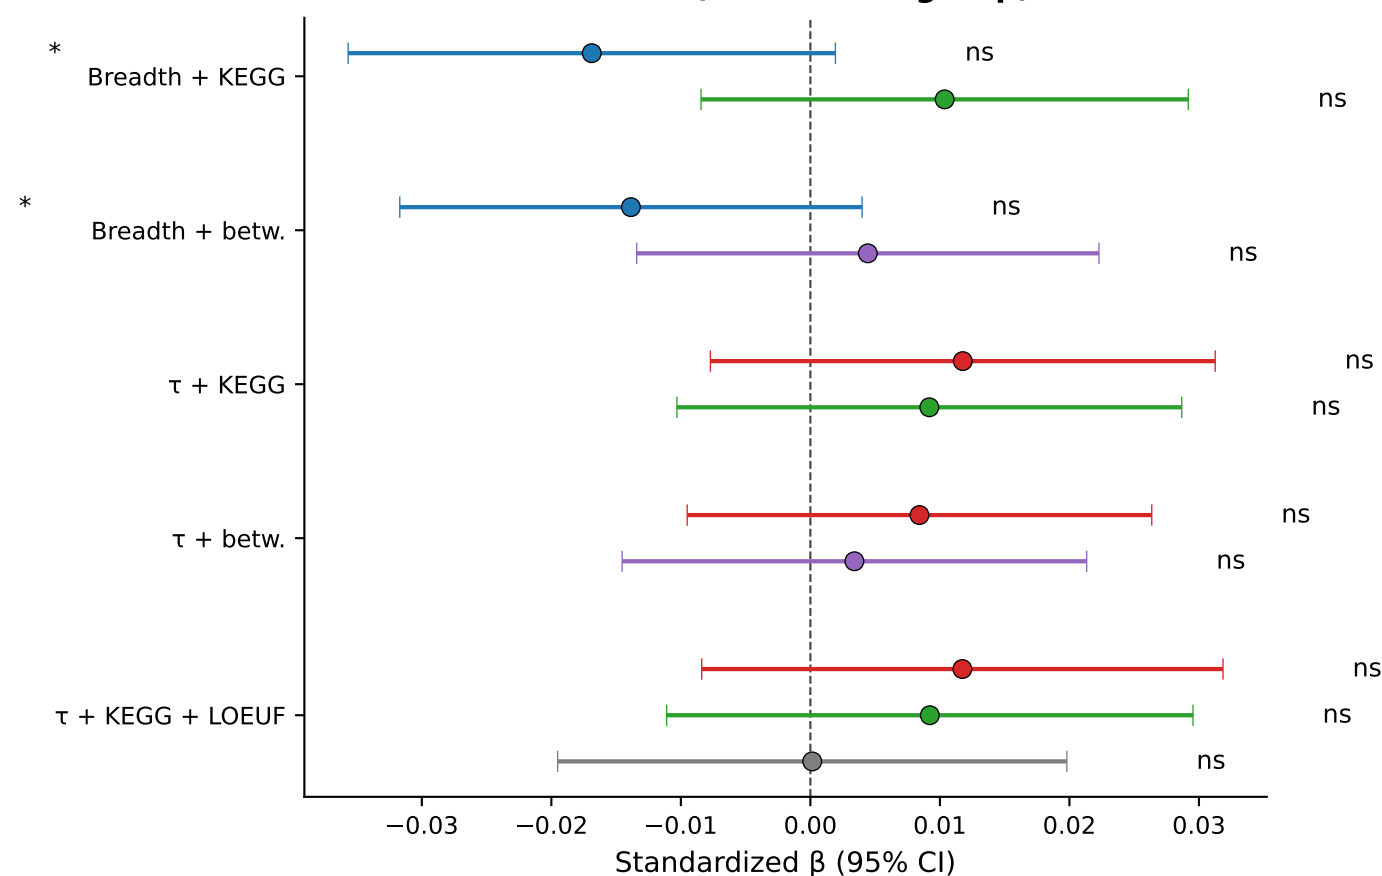

B. PBS-3 Melanesian (S. Asian outgroup) — added-variable

C. PBS-1 African (S. Asian outgroup) — coefficients

D. PBS-3 Melanesian (S. Asian outgroup) — coefficients

● Tissue breadth ● KEGG $\log_{10}$ (pathway count) ● Betweenness (sqrt) ● τ (tissue specificity) ● LOEUF (constraint covariate)
