

Within-network predictors of branch-specific genome-wide-percentile PBS (* = within-network permutation $p < 0.05$)

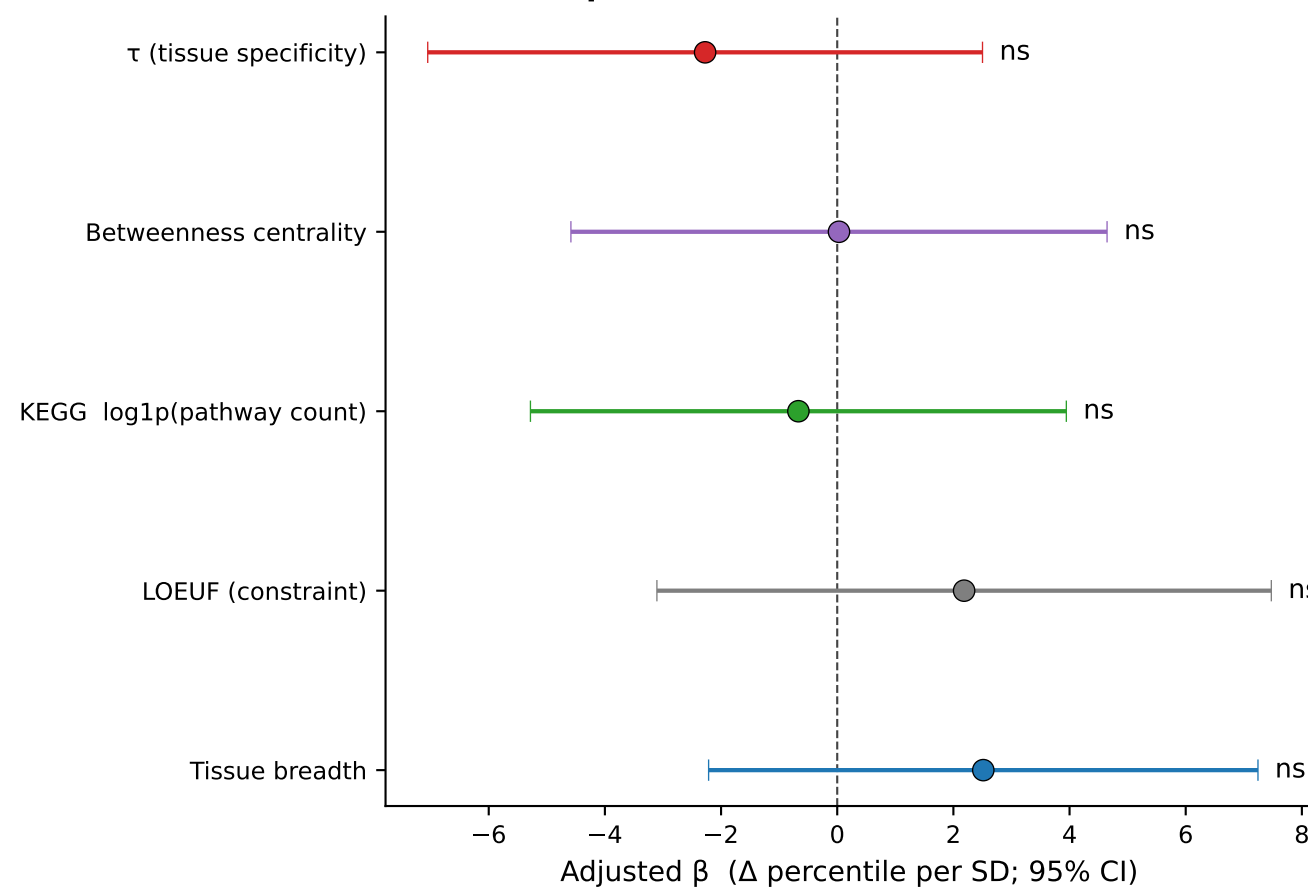

AFR — African (PBS-1, S.Asian outgroup)

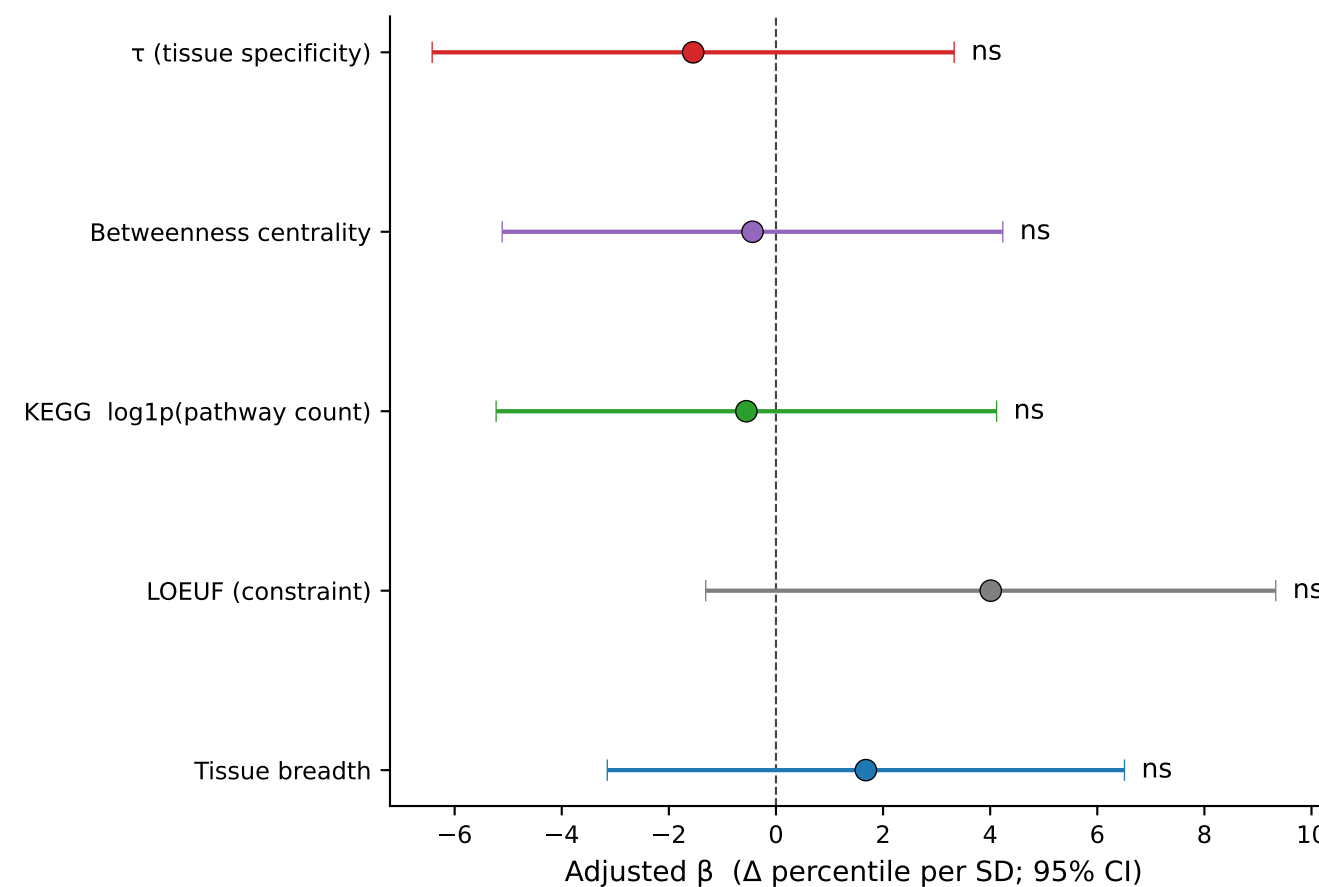

MEL — Melanesian (PBS-3, S.Asian outgroup)

EUR — European (Afr-Mel reference)

SAS — South Asian (Afr-Mel reference)

● τ (tissue specificity)
 ● Betweenness centrality
 ● KEGG log1p(pathway count)
 ● LOEUF (constraint)
 ● Tissue breadth
