

Pigmentation gene sources — Raghunath n GWAS (gold rings) = canonical 8

The 8 canonical pigmentation genes (Raghunath n GWAS Catalog ≥ 2)

- | | |
|---------------|-------------------|
| EZR | Other |
| KITLG | Developmental/NC |
| MAP3K1 | Generic signaling |
| MC1R | Pigment-specific |
| OCA2 | Pigment-specific |
| PAX3 | Developmental/NC |
| TYR | Pigment-specific |
| TYRP1 | Pigment-specific |

Functional category (manual annotation)

- | |
|-------------------|
| Pigment-specific |
| Developmental/NC |
| Generic signaling |
| Other |

Overlap with "Pigment-specific" category:
4 of 8 canonical genes are Pigment-specific (OCA2, TYRP1, TYR, MC1R)
3 Pigment-specific genes are NOT in canonical: (DCT, PMEL, MLANA — lack ≥ 2 GWAS associations)
